

Always have the information you need at your finger tips.
Securely access IBM Connections while on the go.

Where do I get IBM Connections for my mobile device?

IBM Connections is available from the Google Play Store, Apple App Store, and BlackBerry App World™

Best Practices

I need access to information in IBM Connections from my mobile device.

All of the IBM Connections information and contacts you have access to from your desktop can also be accessed from your mobile device.

Home > select an application

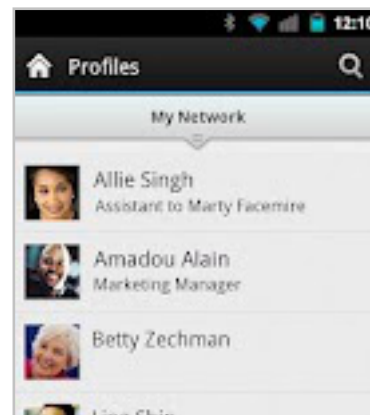

This assumes you have installed Connections on your mobile device. Connections is available in your device's application store.

I need to contact someone but I don't know their email or phone number.

Find the person you want to contact quickly by accessing your network contacts or searching for them in profiles.

Home > Profiles > My Network or Search

Best Practices

I am at a conference and I want to share some interesting information I just learned.

Add a status update, post to your blog, or upload a file from anywhere you are.

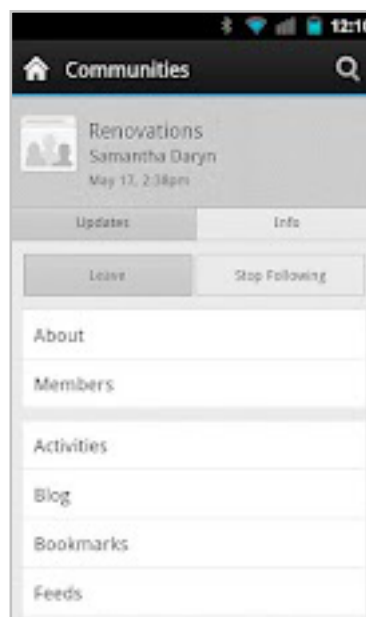

Click the plus sign that appears at the top of most screens.

I am at a customer site and need access to information in a community.

Locate a community and all of its information is at your finger tips. For example, you can read blog posts, browse sections in an activity, read wiki topics, and check on to-do items.

Home > Communities > My Communities

I need to view a file and provide some comments.

Quickly find and view files where ever you are. Browse files using the options you are familiar with from the desktop: my files, pinned files, pinned folders, shared with me, etc. Post comments and see when the file was last updated.

Home > Files > My Files

Viewing Symphony files requires that you have Lotus Symphony mobile installed on your device.
